

Interested in participating in a research study on Speech?

We are studying communication in adults with and without Parkinson's disease. This study will help us learn how much a person with Parkinson's disease finds benefit from speech therapy.

Who will qualify:

Adults **with** and **without** Parkinson's disease.

What is involved:

You will attend 1 to 5 visits with a Speech-Language Pathologist at Sacred Heart University. Visits will last 1-2 hours.

If you have Parkinson's disease, you have a choice to participate in SPEAK OUT! speech therapy, too. SPEAK OUT! therapy is free of charge, and involves an additional 9-12 visits. You do not need to participate in SPEAK OUT! to participate in this study.

Where:

Speech-Language Pathology Program at Sacred Heart University, Fairfield, CT.

IF INTERESTED:
